

We are hiring: Architect (mid-level)

We are looking to hire an architect with 2–5 years of experience, to work on the full design arc – from concept to detailed design – in private residential and mixed-use developments.

You will work along a Project Architect and will be exposed to a variety of projects, all along being guided and fully supported, so that you can take ownership for your work.

On offer:

Competitive salary, a full time position and the potential to gain greater responsibilities in a growing company.

About us:

Punching above our weight, we work with rigour to deliver contemporary architecture of the highest quality. We design buildings that are engaged with and respond to their topography, landscape and place – and most of all, to the needs and aspirations of the people who will inhabit them.

We believe in simplicity of form. We achieve it through a methodical and layered resolving of the multiple complexities inherent in a building. This then frees us to concentrate on the key question: "what is it like to be in that space?", and bring an element of surprise – a sense of joy – to the overall experience of the building.

We design in a responsive way, by maximising the advantages provided by orientation and natural light, and creating views that galvanise the experience of the building; and by working with materials that are suited to the locale and provide efficiencies in the construction process.

The studio:

We are a small studio with a collaborative and supportive culture; you will be guided by a mentor and in time expected to mentor others. We look for people who are comfortable with that culture, being flexible and willing to help other colleagues when needed, yet have initiative and can get on with the work on their own.

Our place:

We are purposely based in Zadar, Croatia – a quiet coastal town with a city personality. Being here gives us the mind space and conditions to do good work while maintaining a great quality of life.

Your profile:

You have strong conceptual skills, an analytical mind, a methodical approach to your work, curiosity for design, and the professional ambition to devise the best architectural solutions.

Your skills:

Proficient in CAD software

Languages: English and German (ideally)

To apply:

Please send your CV and portfolio in PDF (or weblink) to **studio@viktorvrecko.com**
